

DESCALING NOZZLES

PNR offers a full line of nozzles and accessories used in the steel industry for descaling.

Nozzle tips are available in both hardened stainless steel and tungsten carbide.

Shown at the right are nozzles typically used in this application along with assembly fittings and accessories such as nipples, locknuts, filters and flow straighteners.

Please contact us for further information.

ILMAP FILTERING NOZZLES

Ilmap nozzles are used for filtration in drawing water into sand or carbon filter beds.

They find use in a variety of areas such as municipal water treatment plants, the soft drink, steel, and chemical industries.

Ilmap nozzles are fabricated from a variety of durable plastics. They have excellent abrasion resistance and good heat resistance.

Materials: polypropylene (<185° F)
 glass reinforced polypropylene (<240° F)
 Kynar (<275° F)
 PPO and ABS are also available

Please contact us for further information.
